

What we have been doing in class 4?

We have been doing great in Class 4 and the lessons are fun and full of enjoyment so let me tell you about some of them.

ENGLISH

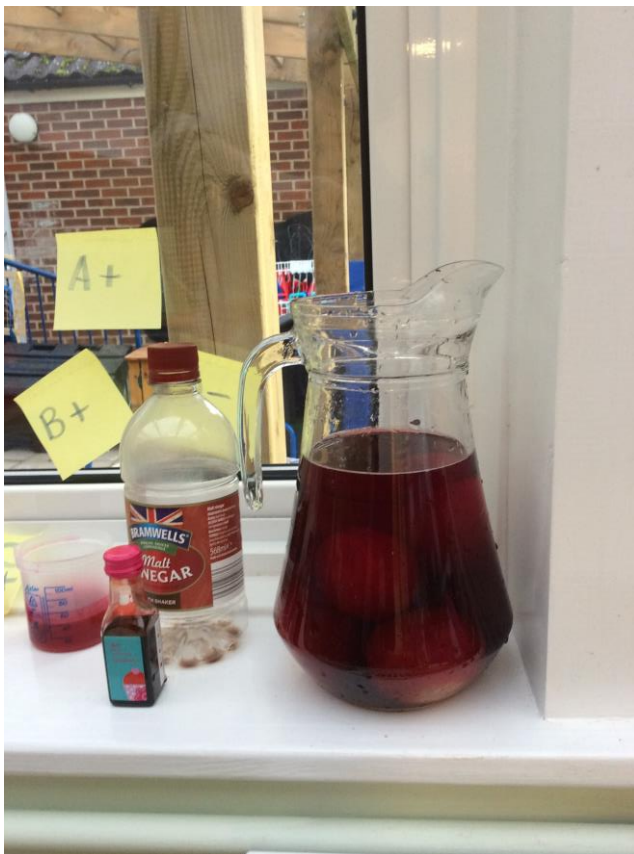

We watched a video about a lighthouse keeper and we wrote our version of the story, news reports, interviews or stories with a different ending.

We made a story using objects we brought in about an animal and how it gained or lost something.

SCIENCE

In science we put some eggs in a jar of vinegar and then 2 days later we swapped it for red food colouring. We are really looking forward to cracking them this afternoon to see how they feel and what it looks like inside.

We also did an experiment where we added water to skittles. The colours diffused creating a colourful pattern.

The final thing we did was we added 100ml to a plate with a jelly minion on. Over night they expanded. This is an example of how water helps us grow and osmosis.
