

### Our non-chronological reports

We are doing non-chronological reports (which means not in time order) about green anacondas (*Eunectes Murinus*) in South America. In our reports we have to write things like the size and weight of the Green Anaconda and how it is the biggest snake in the world.

### Staying healthy

In science, we are doing the human body and staying healthy,

for example: which drinks and food we should have to stay healthy.

You need to keep fit by doing exercising but you can't overdo it.

### Harvest

We delivered Harvest boxes to members of the local community after today's service.
