

Week beginning 2nd October

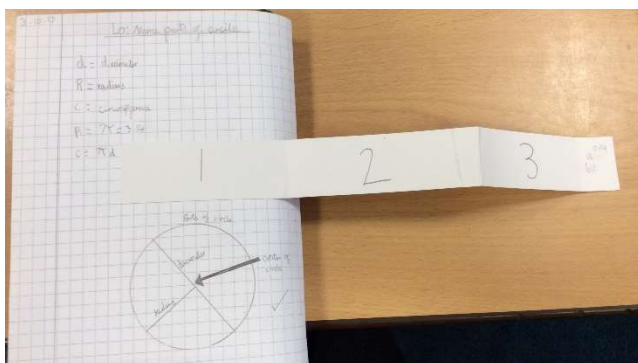

In science we learnt about our pulse. We measured our pulse before and after exercise and found the difference. After we had exercised our pulse rate went up because the heart has to pump blood around your body quicker to take oxygen around our body.

We have been preparing for Harvest Festival and writing prayers.

In maths we have been learning about 2D shapes. We learnt that the angles inside a triangle add up to 180° which is equivalent to a straight line. If you tear off all the corners of a quadrilateral (a four sided shape) and put the points together it forms a circle (360°). This is double 180° which means two triangles are in a square.
