

Week 3 (By Robin, Jayden and Darius)

D.T.

In D.T. we are making a Victorian dolls house as a class. Each table is making a room out of a shoe- box and we are going to make furniture out of recycled containers.

The doll house is not only going to have basic furniture; it is going to have electric lights made out of tinfoil circuits.

Our rooms are going to be all the sorts you would find in a real Victorian house. Including the hall, dining room, kitchen, bathroom, bedroom, nursery (where the children play) pantry, the parlour and the scullery.

Science

In science, we are learning about reflection (when light bounces off an object so that you can see it) and refraction, which is when light bounces off a concave or convex surface which scatters the light so sometimes like in spoons we either see us upside down, short and fat or long and thin.

English

In English, we are learning about creating suspense in our stories e.g. it was... A HEDGEHOG!

We have also been using description to make the reader more immersed in the story and to make them feel like they are one of the characters in the book.

Maths

In maths, we have just moved on from short and long division to converting m to feet, also kg and g to lb.

History

In history, we are doing the Victorians, and about the poor children's jobs in the workhouse etc.

Also we are doing their houses and what their lives were like.
